"Flower Cloud". This is a cross between the C. Rugosa and Grandiflora. The most free blooming Calceolaria (see cut opposite), in all colors. Of a very vigorous growth and resistant against weather influences. Leaves are rather elastic, like those of the Rugosa, making them easy to pack and ship. Tr. Pkt. \$1.00; 3 for \$2.70.

FOR CALCEOLARIAS, use a mixture of loam, leaf-mold and sharp sand. This mixture is suitable both for the seed pans and the pots into which the seedlings, when ready, should be planted. Perfect drainage is important. Calceolaria seed being very fine the seeding should be done with great care and it is suggested that one use a sheet of white paper on which a tablespoon of white sand is distributed. Then shake the seed on top of this sand and mix thoroughly. Then, sprinkle this mixture on the soil of the seed pan, dusting surface with a little fine sand, cover with a sheet of glass and place in the shade. For moisture, immerse the pans in water. As the seedlings come up lift them carefully when quite small and prick them off into a flat allowing two inches square for each plant. It is important that the leaves of one plant should never be allowed to overlap those of another or decay will probably result. When established in pots shift them into the larger size. At the last shift give them some manure water, not too strong, about once a week.

New Double Cyclamen

It is a full double petaled flowering strain, the individual flowers averaging 10 petals. A plant in full bloom gives the effect of having about twice as many blooms as the average Cyclamen. It is a real mass of bloom and is also pleasingly fragrant. This strain comes 80% true from seed and we are offering a limited quantity of the following four varieties and in mixture at \$3.00 per 100 seeds; \$25.00 per 1000 seeds.

Prosperity—Described by many as an azalea type, a flaming rose with a distinct clear color, extra fine and a heavy bloomer.

Admiration—A beautiful salmon rose with shaded eye, a very bright shade.

Rosea—A soft rose with a coral cast shading lighter at petal tips, a very pleasing shade, the true multiflora type.

VAUGHAN'S SWISS GIANTS

Vaughan's Giant Pansies

Vaughan's Improved Swiss Giant Mixtures

The flowers of this strain are of enormous size, 3 inches and over in diameter. They are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. Thick petals, of a rich velvety texture, give this strain of pansy the required substance so necessary to a perfect pansy.

The superb colors and color combinations—salmons, pinks, rich reds and blues, are their distinctive feature. Excellent for greenhouse culture. Trade pkt., 50c; $\frac{1}{8}$ oz., \$1.00; $\frac{1}{4}$ oz., \$1.70; oz., \$6.00; 4 oz., \$20.00; lb., \$70.00.

Since this mixture contains but very few self-colors, such as white, blue and yellow, these should be ordered separately if desired. Trade pkt., 50c; $\frac{1}{8}$ oz., 80c; $\frac{1}{4}$ oz., \$1.50; oz., \$5.00; 4 oz., \$16.00; lb., \$60.00.

Vaughan's Giant Mixture

Besides a good share of the "Fancy" strains such as Masterpiece, Bugnot, Cassier, etc., this mixture contains all the self colors such as white, yellow, blue, purple, red, bronze, etc., and is probably the best "general" high grade mixture obtainable. All the flowers are of the "Giant" type and of good shape and texture. Trade pkt., 50c; $\frac{1}{4}$ oz., \$1.25; oz., \$4.00; lb., \$55.00.

NOVELTIES

Introducers descriptions, new seed ready in July.

Boon (K-34). A glorious deep salmon pink on light cream ground. The flowers are bold and beautifully frilled. The stems are very long, usually carrying four fine blossoms. Makes an excellent commercial market variety for late spring sowing in the greenhouse. This excellent novelty was included in the ground of our Sweet Pea seedlings awarded a Gold Medal by the New York Florists Club, April 8th, 1935. Oz., \$1.00; lb., \$14.00.

Chime (L-34). A most pleasing shade of light salmon pink on cream ground. The vines are very vigorous and carry a heavy crop of flowers produced on long stout stems. The flowers are large and nicely waved. Oz., \$1.00; lb., \$14.00.

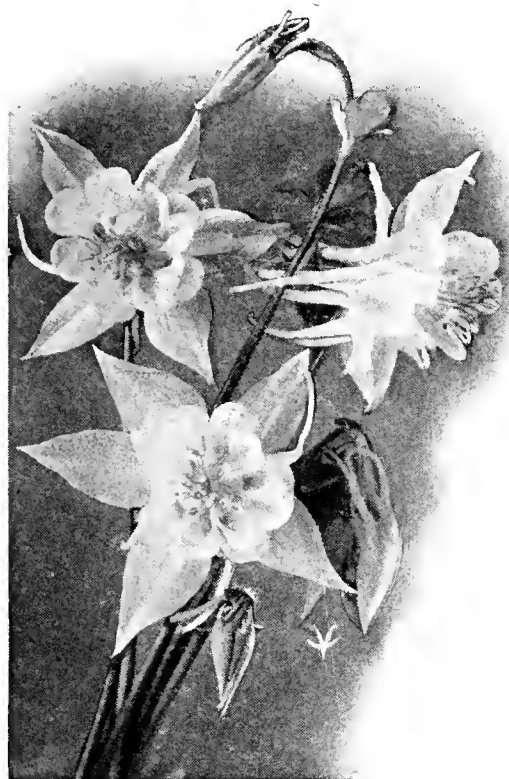

Ramona. A delightful luminous coral rose with yellow and pink shadings blended to make an exquisite shade of geranium pink. The flowers are very ruffled and duplexed which sometimes appear quite doubled with four to the stem. Oz., 50c; lb., \$6.00.

Shirley Temple. This Sweet Pea which we consider the most beautiful we have ever originated, was obtained through a cross between Pinkie and Lady Gay. It has inherited blooms with the size and richness of color in Pinkie plus the dainty frilled and fluted flowers of Lady Gay. The color is softer and more beautiful than Pinkie. The flowers are the largest we have ever seen on any Sweet Pea and it has long stems with four very large blooms on each stem. Oz., \$1.20; lb., \$16.00.

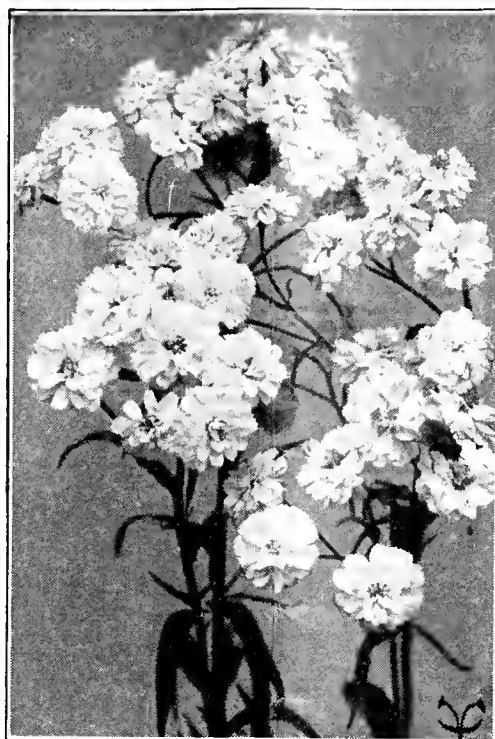

Triumph (M-34). The color is lovely soft lilac-mauve—a beautiful clear shade without any tinge of purple or blue. It is a very vigorous grower and produces a most generous crop of flowers beautifully placed on long stout stems. **Early Triumph** was included in the group of our Sweet Pea seedlings awarded a Gold Medal by the New York Florists Club on April 8th, 1935. Oz., \$1.00; lb., \$14.00.

AQUILEGIA—Long-Spurred Hybrids

ACHILLEA, The Pearl

ANCHUSA Myosotidiflora

One of the most attractive of spring blooming perennials. A real gem for the border.

Seeds of Biennials and Hardy Perennials

Perennials fill a large and interesting place in the operations of an up-to-date florist establishment. Some are as easily raised as annuals, quite a few may be forced, others make fine pot plants and many furnish splendid cutting material. The rock garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to perennials of all kinds. They require little heat, if any, and not much care.

SEED GERMINATES SLOWLY AND IRREGULARLY

Of the following varieties and seed bed should be prepared where it will be undisturbed for a year or more.

Acanthus Mollis, Aconitum, Adonis Vernalis, Anemone, Asperula Odorata, Clematis, Delphinium Cardinale, Delphinium Zalil, Delphinium Nudicaule, Dictamnus, Dielytra, Doronicum Gentiana, Helleborus Niger, Incarvillea, Iris, Peony, Phlox Decussata, Primulas (Alpine) Trollius and nearly all Alpines.

LILIES FROM SEED

The seed can be sown almost anytime, in flats, pans or pots. The soil should be a porous loam of good fertility with no raw manures. A compost of rotted sod and sharp sand, with well rotted organic matter, cannot be improved upon.

For indoor culture, the seed not to be covered more than $\frac{1}{4}$ inch with a sandy soil. When large enough to handle, the seedlings should be pricked off into 2 inch pots, and then set out after danger of frost is over.

Some lilies have the habit, under some circumstances, of waiting until the second year before top growth takes place. Often germination takes place the first year with no growth above the surface.

Lilies can be transplanted at almost any stage of development. They are not exacting in the types of soils to which they were adapted, except that it be porous. They do not like a bakey, plastic clay, or lean, loose sands, unless such soils are ameliorated by the incorporation of an abundance of organic matter which changes their substance.

CALIFORNIA GROWN

FREESIA White Chief

Our freesias bulbs are grown by specialists who know how to handle the stock from the time of planting until they are packed and shipped. Why take a chance of buying from such dealers that buy from growers who grow for "cut flowers" and do not give their bulbs the best of care.

Chicago Growers Testify to the Merits of Freesia White Chief

Palatine, Ill., March 4, 1935
 "I planted 8,000 of your freesia WHITE CHIEF in October and want to let you know that they turned out very fine. The bulbs bloomed 100% and the flowers were good, with nice stems. WHITE CHIEF is certainly a good freesia. In fact, I consider it the best white to plant."
 Walter Schinkonsky, Palatine Floral Co. Inc.

Park Ridge, Ill., March 4, 1935
 "Kindly have your Mr. Huffman call when in the vicinity of our place to see us in regard to our order for freesia bulbs for next season. We want to take this opportunity to thank you for advising us to grow WHITE CHIEF last season. This variety proved to be everything you claimed. Long, stiff stem and large pure white flowers."
 Fritz Pustlauk, Park Ridge Greenhouses

Chicago, Ill., March 9, 1935
 "I consider your WHITE CHIEF freesia the best white I have ever grown. As you know, I bought 10,000 $\frac{1}{2}$ - $\frac{5}{8}$ inch bulbs and cut 11,400 blooms, all of which were perfect. Stems ranged from 24 to 36 inches, blooms were extra large, and pure white in color. In the future I will grow no other white freesia but your WHITE CHIEF."
 Math Streber

WHITE CHIEF

(The New Giant White)

Stems average 18 to 30 inches long; single flowers $2\frac{1}{2}$ inches long. Can be had in bloom first week in January. Forty-five to forty-eight degrees night temperature would bring out the good qualities to perfection. At the prices at which we offer this variety a grower should try a thousand or more.

The color is distinctly new to Freesia, the upper portion of the petals, both inside and outside, are tyrian rose shading down the petals to tyrian pink. The flowers and sprays are gigantic, four and five flowers open at one time. They are delicately perfumed and supported by long, heavy stems with two and three long laterals.

ANEMONES

One of the most showy flowers, good for cut flowers. They thrive in any soil except a very heavy clay. Soak the bulbs in water about 24 hours before planting. Set 10 inches apart, about 2 inches deep. Sunny location, plenty of moisture. **Special Mixed**, 1 year old per 100, \$2.00; per 1,000, \$18.00; 2 year old per 100, \$3.00; per 1,000, \$27.00.

Anemone St. Brigid Irish Champions. The largest flowered strain of Anemones ever offered in the United States. Large, brilliant flowers in a wide variety of colors, over 90% full double. 1 yr. old number one bulbs, per 100, \$2.75; per 1,000, \$22.50.

White Calla

(Aethiopica) Ready in September

Callas being natives of swampy regions grow to best advantage where there is an abundance of moisture, and are therefore very difficult to handle in the curing. Some growers practice **premature cutting off the tops**, expose bulbs to the sun, in order to make early shipment.

Our stock is **thoroughly cured in the ground** and dried thoroughly before they are packed. This, means **later delivery** but better results can be obtained from such bulbs.

We caution forcers of Callas to water this stock sparingly after planting because Calla bulbs store up considerable moisture.
